Financial Controller (Salary TBD)

Permanent (Full Time)

We're looking for a hands-on Financial Controller to take ownership of our accounting operations and elevate our financial foundation as we scale. In this role you'll orchestrate the month-end close, own financial reporting, budgeting, and forecasting, and steer cash-flow and compliance efforts with clarity and precision. You'll design streamlined processes, strengthen controls, and coach a small, high-potential finance team — translating complex numbers into timely, actionable insight for the leadership to drive confident, strategic decisions.

Key responsibilities:

- Lead month-end close, prepare consolidated financial statements.
- Manage general ledger, reconciliations, journal entries, and balance sheet integrity.
- Produce monthly/quarterly management reports, variance analysis.
- Develop and maintain budgets, rolling forecasts, and long-range financial plans.
- Oversee accounts payable, receivable, payroll coordination, and cash management.
- Supervise, mentor, and develop finance/accounting staff; coordinate with external advisors/auditors.
- Drive process improvements and implement accounting systems (ERP/accounting software upgrades).
